

## KILL 'EM QUICK.

That's what we have decided to name our **Booze Joint**. They don't die in the house, for we throw 'em out when we have finished 'em up. Our place is not only headquarters for bad booze, but we have fitted up lodge rooms for the following orders: Anarchists, Lead Pipe Artists, Sneak Thieves, Bunco Men, Gold Brick Merchants and Porch Climbers. If you don't belong to any of these orders, take about four drinks of **Old Prentice, Old Taylor, J. P. Ripy, Cedar Brook or Old Joe**, and we'll guarantee you'll kill at least six men in less than two days. We also have teachers to learn your boys to gamble and swear in short order. The depot agent, across the street from us, will sell him a round-trip ticket to many places, but the point we send him to has no return trains. You know the above to be true, don't you?

### Stop It.

Why, great goodness, man, you'll be bald-headed the first thing you know.

Remember that delay is dangerous. No need to tell you that we run the only strictly first-class Barber Shop in Anderson county, for you already know that.

### COUNTY NEWS.

While we had about made up our minds regarding the handling of county news, we withheld our opinion until court-day, that we might talk with the people of the county and get their opinions regarding the matter. On that day we talked with people from all parts of the county, and were glad to learn that our views of county news well pleased them, and we are now ready to explain to all. First, we will say, with emphasis, that "IT" is and will ever be strictly a county paper. No paper has ever made the fight for that which is to the interest of the county as "IT" has during its short life, and just so long as we go to press we will continue to make a fight for what we think is due the people of the county. We will also have correspondents in every locality to send in each week all news of importance. What we mean by news of importance is as follows: stock sales, real estate sales, crop sales, marriages, births, personals and other things of interest. When we say personals of interest, we mean this: should any of our citizens leave home on business of pleasure, going to another county or state, we look upon it as a personal of interest; but where some citizen simply takes dinner on Sunday with a neighbor or attends church a few miles away we do not think it worthy of being classed as news of general interest to the people of the county. As said, we have talked with our citizens from all parts of the county, and one and all are of the same

mind as we as to what is, and what is not, county news. Were we to report all such happenings here in town each week it would take a paper five times the size of "IT" to hold them. We have arranged with several in different parts of the county to write for us, but are yet in want of many more, and would be glad to hear from all who feel an interest in our paper and their county.

### Improve the Grounds.

What is the matter with the grounds around the public school building? Too bare! void of shade trees or ornaments of any kind, these grounds constitute a veritable eye-sore. True, the building itself is no great shakes, and would hardly be pointed out as a genuine model of the skill of a finished architect. But the Board of Trustees could at least beautify the grounds by setting a few trees. The expense would be light and the improved appearance would richly repay the cost of the trees.

Mr. M. C. Champion was the only Anderson county man to attend the Good Roads convention, at Lexington, last week. He reports that much good was done to promote the interests of the roads of the State.

Lawrenceburg has another paper. It has taken an original name, calling itself IT. It is neatly printed and newsy, and the Times wishes it smooth sailing on the troubled sea.—Georgetown Times.
